Full Stack Software Engineer

I am a former music teacher that is now enrolled in the University of Texas full stack software development program. Originally from Rochester New York, I moved to Austin shortly after I graduated a music education program. Over time I began to notice the similarities between coding and musical notation. They both required a great deal of discipline, attention to detail, and the ability to create anything you could imagine.

Technical Skills: HTML5, CSS, Bootstrap, JavaScript, React.js, JQuery, MySQL, PHP, Node.js, Heroku, Git, API's, Mongo Db, Security and Session Storage
